

Dear Colleagues,

A belated thanks for spending time with the Senior Review committee at their last meeting. They have commented that they found the interactions to be helpful in understanding your operations and your plans for the future.

At the end of the meeting, the committee decided that they would very likely need additional information from you, and might like to have an opportunity to meet with you again during the course of their deliberations. Over the next few weeks they intend to formulate some additional questions and requests for more information that will feed into their considerations and discussions at the next meeting. They hope to have these questions defined by the Thanksgiving week, and then will ask for your responses by the week before Christmas.

I will pass these requests on as soon as I receive them, to give you as much time as possible to consider them.

They will hold their next meeting immediately following the AAS, on 12-13 January, here at NSF. Many of them will also be attending the AAS meeting and be available at the town meeting we are planning to hold the evening of January 10th. It is possible that they may want to meet with some or all of the facilities managers during their meeting; I hope that you will be available during this period. If not, please let me know.

I'll keep you informed as we proceed. If you have any questions, please don't hesitate to ask.

Best regards,

Eileen
