

Resolution Supporting the Senior Review Process
Adopted by the AURA Board of Directors
October 29, 2007

The AURA Board supports a process of reviewing on a periodic basis the priorities and balance within the NSF astronomy and astrophysics portfolio. This competitive review should be aimed at preserving, and even growing, a healthy core program and a reinvesting in the highest priority advanced facilities. AURA will work with the NSF and our community and continue to lead in implementing the recommendations of the Senior Review.
